FOREWORD

Introduction

This bibliography includes 166 titles relating to triticale and written by CIMMYT researchers. It covers conventional published literature as well as unconventional reports, studies, and conference proceedings. Entries in the bibliography are subdivided into seven subject headings (see contents page) and arranged alphabetically by senior author. A complete author index is also included. There may be some missing titles that were not available at the time this document was compiled. We intend to update this bibliography regularly and would appreciate any suggestions for improvement.
